Evaluation 2018, Cleveland**

## *Human rights-related barriers inhibit access, uptake & retention of HIV, TB, and malaria services.*

### *HIV and TB cases face:*

- ⚠ Stigma & discrimination
- ⚠ Punitive/insufficient laws, policies and practices
- ⚠ Gender inequality & gender-based violence
- ⚠ Poverty and economic and social inequality
- ⚠ Legal literacy efforts

# Ensuring a comprehensive approach to addressing and removing barriers to access.

***As consortium partners, JSI and USC are conducting:***

Baseline assessments of existing human rights-related barriers to provision of services using a standardized approach

Kenya, Ghana, and Indonesia (**20 countries** in total)

***Global Fund will use findings to:***

Develop 5-year plan to fund & implement comprehensive set of programs to remove human rights-related barriers

Baseline data to measure impact of interventions
