

Online Reporting: Processes and Lessons Learned

Lessons learned from producing online evaluation reports:

- Online report development requires the right team of people and is a true test in collaboration
- Online reports allow us to present information in a powerful and dynamic way
- Online report development requires both time and money

Think about...

- Current evaluations and how you might translate those or pieces of those reports online
- Upcoming evaluations and how you might build in the time and money for an online report
- Finding collaborators for design and web development

The future of reporting is online!
