What can a Strategic Knowledge Map of evaluation findings tell us?

✓ **Measure our Breadth of understanding.**
  107 total concepts – This high Breadth shows a good understanding of the program and its operating environment.

✓ **Show what parts of our program model are better-understood.**
  11 concepts have 2+ causal arrows leading to them, indicating better explanations of how things work and options for action.

✓ **Show what parts of the map the evaluation evidence supports.**
  The wider arrow indicates that this link has more evaluation data sources to support it (student survey, student focus group, student journals, observation, and project team interviews).

✓ **“Show the invisible.”**
  Many concepts have zero arrows leading to them – these “blank spots” on the map show questions to explore in future research.
