
 **Ethics Focused Sessions**

The following is a list of sessions, assembled by AEA's Ethics Committee, that focus on the philosophical and practical issues of ethics in evaluation, including explorations of the application of the *AEA Guiding Principles* and the *Joint Committee Program Evaluation Standards*. The list was developed via a search of the 2008 AEA Annual Conference program and we realize that we may have overlooked a session that raises important issues of ethics in practice. Please consider this only a starting point for your investigation of this fundamental topic. **(specific presentations within sessions are bulleted)**
